

Product Name :
Table Top Electro Pneumatic Coder

Product Code :
EQUP-MC20087-0030

Description :

Table Top Electro Pneumatic Coder

Technical Specification :

Print Speed Pneumatic
Capacity As per Machine
Type Semi Automatic
Uses Table Top

Table Top Electro Pneumatic Coder, which can be connected to any sensor, limit switch, etc. for online controlled operation or to timer for automatic timed operation Imported pneumatic accessories provide reliability, long life and speeds upto 150 impressions per minute.

Features:

- Electro-pneumatic cylinder based very compact design. Can be very easily installed on existing packaging machinery with bracket supplied suitable for all machine models
- Low cost machine with very low operating and inventory costs. Uses standard grooved or flat stereotypes and fast drying coding ink
- Can be connected to any sensor, limit switch, etc. for online controlled operation or to timer for automatic timed operation
- Imported pneumatic accessories provide reliability, long life and speeds upto 150 impressions per minute

Supply Voltage
Printing Area

230 Vac \pm 10%, 10 VA
6 to 8 Lines (50 X 100 mm.)

Printing Speed	Max. 100 imprints / min.
Prints using	Easily Changeable grooved / flat, rubber / nylon stereos
Inking Medium	Special rechargeable ink / wax cartridge / ink paste
Printing Medium	Quick drying liquid ink (Black, Red, White*, Golden*, etc.)
Impressions	10,000 per 60 ml. charge
Weight	10 Kgs, 5 Kgs (Only head)
