

Product Name :
Carton Strapping Machine

Product Code :
EQUP-MC20087-0042

Description :

Carton Strapping Machine

Technical Specification :

Power Supply 230 Vac
Capacity 20 per minute
Weight 80 Kg
Power Source 230 Vac
Phase Single
Strapping Speed 2 per second
Voltage 230 Vac

Carton Strapping Machine is suitable for strapping cartons of various heights very quickly without the need for bothersome strapping tools & metal seals.

When you place the carton on the table & pass the strap around it, the strap self-tightens, cuts & seals onto the carton automatically & is ready for the next carton.

Features:

- Simple Operation: Ergonomically designed control panel for easy operation. Strap at quick speed and with high efficiency. Only takes 1.5 seconds for strapping one polypropylene (PP) strap
- Quick Heating: Instant-heating systems, low voltage of 1 V., high safety and will be in best strapping state in 5 seconds after you start the machine
- Engine: Robust and Precise Construction of engine requires easy and simple routine maintenance to ensure longer life
- Energy Saving: Designed to cut off after 1 minute when not in use - prolongs motor life and is energy efficient.
- Wide Range of Strap Width Selection: Simple adjustable strap guide to accommodate strap width from 6 mm to 15 mm

-
- Variable and Consistent Tension: Tension can be easily adjusted from low to high by a simple knurled nut.
 - Electromagnetic clutch, quick and smooth. Coupled - Axle Transmission, Quick Speed, low noise, low wear and tear, hence maintenance free
 - Powder Coated body & parts, Stainless Steel tabletop. All electrical components like timer, solenoid, micro switch etc. of best quality
 - Lift type top cover allows convenient maintenance

| | |
|-------------------|---------------|
| Strapping Tension | 5 – 60 Kg |
| Strapping Speed | 2.2 sec/strap |
| Strap Width | 6 – 15 mm |
| Power Supply | 220 VAc, 1 Ph |
| Consumption | 0.4 KVA |
| Machine Size | 82X56X68 cm |
| Machine Weight | 80 Kg |
