

Product Name :
Agricultural Destoner Machine

Product Code :
EQUP-MC20052-0007

Description :

Agricultural Destoner Machine

Technical Specification :

De-Stoner machine is used for removal of heavy foreign contaminants like stones, metallic and glass pieces, mud balls etc. from grains and seeds of all crops. It works on the principle of vacuum negative pressure. It also separates the lightweight particles and impurities if any by air suction. It can also classifies the materials. Destoner machinery is suitable for all types of grains like wheat, rice, sesame seeds, barley, maize and other items. It can also be used for nuts.

Features of Destoner Vacuum Machine:

- Oscillating Housing with Exhaust Hood and Acrylic view-ports.
- Fluidized deck with Self-Cleaning System.
- Deck Inclination Adjustment with inbuilt jack.
- Valve for Suction Adjustment.

Sieve Type	De-stoner
Condition	New
Automation Grade	Automatic
Color	Green and white
Material	SS
Brand	Sifter
Features	Fluidized deck with Self-Cleaning System
Item Code	Destoner-Machine
