

Product Name :
Army Military Mine Detector

Product Code :
EQUP-MC20008-0015

Description :

Army Military Mine Detector

Technical Specification :

- Effective detection of magnetic, nonmagnetic and stainless-steel metal masses
- Accurate pinpointing of the target's position using a bitonal system and acoustic modulation proportional to the dimensions of the detected mass
- High discrimination capability for adjacent metal masses
- Compensation for mineralized and high natural metal content soils
- Static and dynamic detection independent of the speed of transit of the detector head
- Very long-lasting battery charge
- Light, ergonomic detection head designed for continuous use
- Extremely high level of electrical and mechanical Reliability
- Operation monitored by a microcomputercontrolled autodiagnostic system
- Completely digital electronics, with in-the-field program memory upgrade capability
- Ease of use with minimum training time

-
- Thanks to many years of in-depth research in the field of Metal
 - Detection by DRDO has established itself as a primary international
 - manufacturer of high-performance Ground Search Metal Detectors

Thanks to many years of in-depth research in the field of Metal Detection by DRDO has established itself as a primary international manufacturer of high-performance Ground Search Metal Detectors

LEADER IN PERFORMANCE AND RELIABILITY

The portable, high-sensitivity Metal Detector designed to detect magnetic and non-magnetic metals in all soils, including laterite and magnetite. The Metal Detector comprises a detection head, a telescopic handle, an electronics unit, a canvas carry-bag and a High Impact Polypropylene Case
