

Product Name :
Mobile Solar Array With Solar Tracking System

Product Code :
EQUP-MC20153-0002

Description :

Mobile Solar Array With Solar Tracking System

Technical Specification :

The Mobile Solar Array with Solar Tracking System is an optical sensing system used to sense and track the sun's position throughout the day. The sensors feed information to the control box where it processes information on direct component of sunlight available, the diffuse amount of sunlight, the total amount of sunlight as well as the differential amount of sunlight on opposing sensors. The Mobile Solar Array w/ Solar Tracking Option Mobile Solar Array Option are options of Photovoltaic Installers Trainer and are dependant upon it.
