

Product Name :
Portable Biological Material Detector

Product Code :
EQUP-MC20283-0001

Description :

Portable Biological Material Detector

Technical Specification :

Using high-power diode array technology, it has super discovery function for biological active ingredients, such as blood, occult blood, seminal fluid spots, saliva spots, sweat spots, urine traces, hair, shed cells, bone and tooth fragments, etc.

Shell material: aluminum alloy

Power: 60W

Light source wavelength Purple light: peak wavelength: 365nm±15nm;

Blue light: peak wavelength 445nm±15nm;

Green light: peak wavelength 532nm±15nm;

Battery bag size: 108*74*66mm

Hand-held lamp size: 74*198*53*64mm

Weight 1.15kg ?with the battery?

On-off control: Metal key switch and time delay control technology are adopted. Long press the switch for 2 seconds to turn on the light, so as to ensure that the switch will not trigger the light due to accidental touch.
