

Product Name :
Super LED Bio-material Detector

Product Code :
EQUP-MC20283-0006

Description :

Super LED Bio-material Detector

Technical Specification :

The super LED bio-material detector can be widely used to search urine, saliva, vaginal secretions, blood and other biological material (It will not damage DNA), and the fiber, fall off cell fragments, bones, teeth, paint, potential fingerprints, shooting residues and other material evidence

The shell material: Aluminum alloy

Power: 40W

Wavelength: 445 nm

Battery pack size: 160*150*80mm

Hand-held lamp size: 260*151*98mm

Weight: 4.84kg

Power supply: backpack type DC discharge
