

Product Name :
LED Scene Investigation Search Light

Product Code :
EQUP-MC20283-0009

Description :

LED Scene Investigation Search Light

Technical Specification :

This light with small volume, easy to carry, uniform light irradiation, light spot evenly, wide light projection, no color difference, no light grain, no need to use optical filter, easy to charge, can be used at any time, no memory effect, equipped with triangular bracket, can be fixed on the triangular bracket to take pictures.

Small volume, easy to carry, uniform light irradiation, light spot evenly, wide light projection, no color difference, no light grain, no need to use optical filter, easy to charge, can be used at any time, no memory effect, equipped with triangular bracket, can be fixed on the triangular bracket to take pictures.

Power prompt function: the device is equipped with low power prompt function. When the power is less than 20%, the metal button switch flashes red.

Stable performance, continuous use for more than 8 hours, still can be used normally, core components will not be damaged.

Light source: CREE XHP70 LED White light

Color temperature: 6000K

Light spot center illumination: 6600LX

Illumination uniformity: ?90%

Lithium battery capacity: 14.4V 3400mAh

Charger Input: AC100-240V 50-60Hz; Output: DC16.8V 2A

Working time: Maximum power works continuously for about 80min

Material: Aluminum alloy

Power: 30W

Luminous flux: 700LM

Light spot size: ?40cm

Power supply mode: Direct current supply
Weight: 0.82kg(Contain the battery)
Charging time: 150min
Lifetime: 50000h
Size: ? 53*270mm(including handle 113*270mm)

Equipments Machines Manufacturers
