

Product Name :
Police Rescue Glass Breaker

Product Code :
EQUP-MC20281-0016

Description :

Police Rescue Glass Breaker

Technical Specification :

The main body of the police rescue glass breaker is made of aluminum alloy and stainless steel, and the impact cone is made of steel and tungsten steel. The surface is sandblasted anodic oxidation process, with CO2 compressed gas as the power, used to break all kinds of vehicle toughened glass and all toughened glass within 19mm thickness

Scope of action: Toughened glass and double insulating glass with thickness?19cm can be broken.

Hit times: A single cylinder can continuously break glass times?30

Cone head life: ?100 times

Material: Aluminum alloy, stainless steel.

Surface treatment: Matte black anodized

Waterproof rating: IPX8 (immersion level)

Length of handle: 860mm in contraction state, 1500mm in tension state

Length of middle handle: 500mm

Short shank length: 280mm

Head length: 150mm

Maximum extension length: 2150mm

Cylinder pressure: 6MPa

Adaptable temperature: 20?~+50?

Application : Anti-terrorism, anti-narcotics, fire fighting and rescue

Storage life: 12 years (avoid light and moisture)

Equipments Machines Manufacturers
