Product Name :
Footprint Light Source

Product Code :
EQUP-MC20283-0011

Description :

Footprint Light Source

Technical Specification :

Lamp Type: 18 pcs high power CREE LED imported from the USA.
Dimension: 320mm*225mm*105mm
Light Source: it simulates natural light to uniformly distribute, super white light.
Weight: 2.6 Kg (with battery)
Mirror: imported glass cylindrical mirror
Luminous flux: 2500LM
Color Temperature: 6000K
Power: 100W
Lifetime: 5000h
Power Supply: DC-AC
DC: 18V
Continuous illumination time: 80 minutes with the high capacity imported Sanyo electric lithium battery pack. It also can be customized to 1.5, 2, or 2.5h.
Output light width: it reaches 80cm width at the distance of 50cm away from the light source.
Diffusion Angle: horizontal 80, vertical: 15.
The beam spot shape: it is rectangular, the spot size is 90*10cm at the distance of 0.5M away from the lamp.
Spot Uniformity: the light intensity of the marginal spot should not be less than 25% of the central spot.
Monochrome photographing function: configure blue, orange optical filter to achieve color separated photographing (which is optional).
Polarized light output function polarization photography
Package Size: 350*490*150mm

Box: high-grade aluminum alloy box
Weight: the total is 6-6.5KG, 2-2.6kg each one
