

Product Name :
Long Distance Night Vision Viewer

Product Code :
EQUP-MC20284-0014

Description :

Long Distance Night Vision Viewer

Technical Specification :

This night vision device provides high-definition viewing images during the day, and works best in low light and night conditions. We are manufacturer in China, our factory has a competitive production capacity. We are professional and capable to provide 100 sets products per month, ship within 20 working days. And we sell goods to our customers directly, it can help you with omitting intermediate expenses. We believe with our strength and advantages, we can be a strong supplier to you. For the first cooperation, we can offer samples to you at low price.

Observation Range at low light About: 1500m

Recognition Range at low light: About 300m

The sensor type: CMOS

Effective pixels: 1945 (H) *1225 (V)

The video resolution: 1080P (25fps)

The video signal: SDI

Color minimum illumination: 0.000001LUX

Wide dynamic range: 120db

The screen size: IPS 7 inches widescreen LCD

The screen resolution: 1920*1200

The screen brightness: 1500nit

Operating mode: Touch screen control

Storage medium: standard 1TB (maximum 2TB)

Video file format: MOV (10 bit code)

Working voltage: DC 9-12V

Power consumption: 21W
