

Product Name :
Fruit Roller Drum Washing Machine

Product Code :
EQUP-MC20088-0006

Description :

Fruit Roller Drum Washing Machine

Technical Specification :

Product performance characteristics

1. This machine is suitable for the cleaning of fruits, vegetables such as potatoes, carrots, oranges, thorns, etc. After the materials enter the cylinder, they are spirally propelled, and the soil and dirt on the surface of fruits and vegetables are cleaned by spraying.
2. The inner wall of the drum is turned over without stopping the material to make the cleaning more uniform. The washing water and foreign matter are discharged from the drum hole and discharged from the overflow of the water tray.
3. The overall frame is made of stainless steel and meets food hygiene standards;
4. The spray water can be sprayed with tap water or pure water, which can be combined with the front and rear cleaning equipment for recycling.

Capacity(T/H)	Power(KW)	Dimension(mm)
1-3	3.7	3500x850x2200
3-5	4.5	4500x1000x2200
8-10	8.2	6000x1200x2200
13-15	10.5	7000x1500x2200
