

Product Name :
Fruit Pulping and Refining Machine

Product Code :
EQUP-MC20088-0010

Description :

Fruit Pulping and Refining Machine

Technical Specification :

Product performance characteristics

1. It is mainly used for peeling, seeding, beating and refining of fruits and vegetables such as tomatoes, strawberries, hawthorn, red dates, alfalfa and sea buckthorn to achieve the purpose of separation of pulp.
2. Incorporating Italian technology, unique tapered screen structure, high pulping rate;
3. Automatic cleaning interface, built-in multi-angle shower head, cleaning automation process;
4. High-precision dynamic balance detection, more balanced operation and lower noise;
5. The internal screen aperture is customized according to different materials, and is divided into single and double-station stations to meet the needs of different fruits and vegetables and different processing capacity.

Processing capacity (t/hr)	1-2	3-7	8-10	10-15	15-20
Power(kw)	6	15	22	30	37
Blade rotation speed(r/min)	1440	1440	1440	1440	1440
Screen aperture (mm)	0.6-0.8-1.1	0.6-0.8-1.1	0.6-0.8-1.1	0.6-0.8-1.1	0.6-0.8-1.1
Dimension (L*W*H)	1650*1100*1680	1850*1300*1680	2000*1500*1850	2200*1800*2100	2500*2000*2250
