

Product Name :
Sanitary Centrifugal Pump

Product Code :
EQUP-MC20082-0003

Description :

Sanitary Centrifugal Pump

Technical Specification :

This series of pumps is a single-suction, single-stage, centrifugal sanitary pump, suitable for transporting various liquids such as milk, beverages and wine. It is an indispensable conveying equipment for food, chemical and pharmaceutical industries. The maximum temperature for a single machine seal is about 120 °C, and the maximum temperature for a double machine seal is 150 °C. Among them, the high lift pump is especially suitable for tube sterilization and yogurt temperature keeping equipment.

ABB motor power:1.5 KW,
stainless steel casings,
head of the 24 m
