

Product Name :
Utilities Water Chiller

Product Code :
EQUP-MC20084-0001

Description :

Utilities Water Chiller

Technical Specification :

1. Compact structure, smooth operation: the unit condenser, evaporator all USES efficient threaded the pipe, the host USES imported brand the fully closed compressor, a compact structure, small volume, light weight, etc advantages;
2. Perfect energy control system: the temperature controller can be according to the change of load from the adjustment to stop and open unit, etc.
3. Easy operation intuitive: unit adopts imported temperature controller control units, and the parameters set is simple, direct display.
4. The streamlined beautiful design, the internal according to user requirements with stainless steel tank and high performance, high flow special water pump. The pump pressure can also according to customer request configuration, the design is more flexible.
5. Multiple protection system, safe and reliable: except for the compressor unit interior protection modules offers super voltage, phase lack, overload and function, but also equipped with freezing, pressure control and protection device, make the unit work correctly.

Cooling capacity	Refrigerant	Compressor power	Circulating pump power	cooling fan	
Kcal/h		Hp	Hp	diameter mm	Air volume m3/h
15093	R22	5	1	550	6487
24148		8	2	600	10820
30186		10		500	2*6246
45279		15	3	550	2*8487
60372		20		600	2*10820
75465		25	4	630	2*12220
90558		30		700	2*15000
120744		40	40HP above according to customer	750	2*19000

150930	50	requirements	630	3*12220
181116	60	configuration	700	3*15000
241488	80		750	3*19000
