

Product Name :
The small scale milk, yoghurt, juice combined production Plant

Product Code :
EQUP-MC20089-0013

Description :

The small scale milk, yoghurt, juice combined production Plant

Technical Specification :

This combined production Plant adopts the most advanced technology, it combine the water treatment system, mixing tank, emulsify tank, homogenizer, sterilizer, fermentation tank, storage tank, water chiller, air compressor, steam boiler, CIP, pipes, fittings etc as one combined production Plant, the system outlet can be connected directly to the filling machine. The system have feature of reasonable structure, beautiful shape, can greatly reduce the production area of space, less worker of operation, low cost of maintenance, This combined production Plant can produce pasteurized milk, yogurt, ice ream, fruit juice, tea beverages, etc. All electrical appliances and accessories are from international famous brand, Stainless steel structure, conform to the hygiene standard.

Production capacity	300,500,1000Litre/Hour
Final Products	Milk, Yogurt, Juice, Ice Cream
Packaging	Plastic Pouch, Bottle, Cup, Carton, etc
Power	380/220V, 50/60HZ, 25-35KW
Production Area	80-100 sq.m
Production Personal	1-2 person
Size	2800*2000*2300-2800(MM)
Weight	2400-3500KGS

Equipments Machines Manufacturers
