

Product Name :
Passion fruit Guava Beverage Processing Plant

Product Code :
EQUP-MC20089-0022

Description :

Passion fruit Guava Beverage Processing Plant

Technical Specification :

Suitable for processing of passion fruit, guava to produce clear juice, turbid juice, juice concentrate, etc. This production Plant is mainly composed of cleaning machine, sorting machine, elevator, peeling crushing machine, belt press, enzymolysis system, horizontal decanter, homogenizer, degasser, sterilization machine, filling machine equipment, etc. This production Plant design features advanced design idea, high degree of automation; Main equipments are all made of high quality food grade stainless steel, accords with the hygienic requirements of food processing.

- * Capacity varies from 3tons/day to 1000tons/day.
- * Able to handle passion, guava
- * Can produce clear juice, turbid juice, juice concentrate
- * Production Plant configuration is flexible, according to customer's different requirements in processing technology and finished product
- * Special peeling and crushing machine to work at high efficiency
- * Belt press type to yield juice without damaging seed at a high rate.
- * Build-in CIP system to make clean easy
- * Material contact part of the whole system is 304 stainless steel material, fully meets the food hygiene safety requirements.

Raw material

Finished product

Capacity range

Passion fruit, guava

Clear juice, turbid juice, juice concentrate

3tons/day to 1000tons/day

Brix of juice	15~20Brix
Brix of concentrate	36~65Brix
Package options	Ring-pull can/ tetra pak /oral liquid bottle/PET
Design capacity	According to clients' requirements

Equipments Machines Manufacturers
