

Product Name :
Coconut Water Milk Processing Plant

Product Code :
EQUP-MC20089-0023

Description :

Coconut Water Milk Processing Plant

Technical Specification :

Suitable for all kinds of coconut to produce coconut water, coconut milk, juice with coconut ,coconut powder and etc. This processing Plant is combined with peeler, pulverizer, screw separator, filtration, disc centrifugal separator, blending system, degasser, homogenizer, sterilizer, filler, flusher, autoclave, ink coder and etc. With advanced design philosophy, high degree of automation; Main equipments are all made of high quality food grade stainless steel, accords with the hygienic requirements of food processing.

- * Produce coconut water, coconut milk, coconut juice and etc
- * Capacity ranges from 500kg/h to 20t/h,designed by the customer's needs
- * Configuration is flexible, according the requirement of client to prepare the suitable machine
- * With aseptic filler and hot filler
- * Modular design, which can combine different processing technique
- * High automatic degree, labor-saving
- * Equipped with CIP to make clean easy
- * Material contacted with production is SUS304 stainless steel, fully meets the food hygiene safety requirements

Raw Material	Coconut
End Product	Coconut juice, Coconut milk,Coconut water,Coconut powder
Capacity	500KG/H-10T/H,Customized
Package Material	Adjustable
Volume	Adjustable
Package	Tin can/PET/ Tetra Pak/

Equipments Machines Manufacturers
