

Product Name :
Packing Single Side Sticker Labeling Machine

Product Code :
EQUP-MC20085-0003

Description :

Packing Single Side Sticker Labeling Machine

Technical Specification :

Phase Single Phase
Power Supply 230 V
Frequency 50Hz AC Supply
Uses round shape objects. glass, tin, PET, HDPE bottles and corrugated containers

Understanding the significance of futuristic technologies, we produce highly advanced **Single Side Sticker Labeling Machine**. It boasts of a range of innovative technologies such as, slat conveyor, label dispenser unit, optical label scanner, label pressing assembly and advance controller.

Matchless Performance:

- This automatic machine is equipped to performing its task with matchless convenience. There are three most important components of this machine.
- Low Maintenance
- Unlike other ordinary machineries, it requires very minimal maintenance. Hence, users don't have to bother about maintaining it by spending tons of money or manpower.

Long-Lasting:

-
- It is long lasting due only to the premium quality and remarkably strong build-up. It performs its assigned duty with perfection without any trouble. Besides, it offers noiseless operation.
 - Reliability
 - Reliability is yet another integral component of this machine. It goes on for years without any trouble. It truly signifies the word assurance.

Smooth Function:

It has a space creator that is capable of creating gap between two containers when they move on the conveyor. The optical label scanner is able to sense the container label dispenser unit in order to apply sticker perfectly. The pressing belt offers the container the required presser in order to stick the label appropriately.
