

Product Name :
Packing Inclined Slat Conveyor

Product Code :
EQUP-MC20085-0015

Description :

Packing Inclined Slat Conveyor

Technical Specification :

Surface Polished
Frequency (Hertz) 50 Hz
Material Aluminium
Working Temp 80 temp
Voltage 220 V
Load Capacity 50 kg/m

The manual mark distributor like InclinedSlat Conveyor is utilized to hold the move of names and to give support in pulling the sponsorship from the name. This sort of hand held mark instruments are perfect for monotonous naming of boxes and packs. For marginally less volume of creation, the self-loader mark allocator is utilized. Here the mark is connected mechanically while the thing to be named is put in the machine physically. Programmed marking machines are utilized for high unit generation where the entire procedure would be mechanized. The machine is associated with the generation line of items or bundles where the item specifically achieves the machine.
