

Product Name :
Packing L Shape SS Slat Chain Conveyor

Product Code :
EQUP-MC20085-0016

Description :

Packing L Shape SS Slat Chain Conveyor

Technical Specification :

Voltage (Volt) AC200V(3PH)
Belt Material Carbon steel
Material Aluminium
Power 0.2 0.4 0.75 1.5(W)
Moving Capability max 300kg/m
Voltage 220V/380V
Load Capacity Max300KG/M

A transport line in SS Slat Chain Conveyor L Shape Engineering is utilized to move the item into position as the machine detects it and applies mark. Later the thing would be moved to the bundling area through the belt itself. Distinctive sorts of mark containers are utilized to handle diverse items and workload. Aside from being a data supplier, the name is likewise used to design the item or its bundle furthermore to improve the presence of the item. A quality mark draws in the consideration of potential purchasers accordingly enhancing the deals furthermore picture working for the makers.
