

Product Name :
Packing Automatic Bottle Unscrambler System

Product Code :
EQUP-MC20085-0048

Description :

Packing Automatic Bottle Unscrambler System

Technical Specification :

Power Source Electric
Voltage(V) AC220 V
Material Stainless steel
Frequency 50Hz
Speed 200 bottle/min

Due to its efficient design and low power consumption, this Automatic Bottle Unscrambler is highly demanded. In addition to this, the offered products are used in various packaging industries. These machines are easy to operate and require minimum maintenance. To ensure a defect free range, these machines undergo various quality assurance checks.

Features:

- Uniform flow of container
- Full body constructed by S.S. 304 materials
- Suitable for various type of container
- Jerk free and noiseless operation

Optional Features:

- Caster wheel with lock for easily transportation
