

Product Name :
Web Sealer Shrink Wrapping Machine

Product Code :
EQUP-MC20086-0010

Description :

Web Sealer Shrink Wrapping Machine

Technical Specification :

Type Semi Automatic
Usage/Application Shrinkable
Film LD
Packaging Material Plastic
Automation Grade Semi-Automatic
Capacity Variable
Color VIP Bleu
Material Mild Steel
Voltage 220 V
Driven Type Driven
Phase three Phase
Power 180 W
Air Pressure Of Working 4 - 5 kg.
Dimension 1500 X 500 X 500
Weight 450 kg.
Packing Speed Variable
Sealing Temperature 200
Air Pressure 4 - 5 kg
Bag Type Metalized
Blower Motor 1/6 HP
Condition New

Reckoned as leaders in this industry, we are providing our esteemed clients with excellent quality Web Sealer Shrink Wrapping Machine. Increases the strength of the cartons to sustain rough handling, the offered wrapping machine is designed using top quality raw material and modern technology under the guidance of our skilled professionals. The offered wrapping machine is provided in several specifications as per the requirements of customers. Moreover, our clients can avail the offered wrapping machine from us at nominal rates.

Features:

- Excellent speed
- User friendly
- Unique design

Specifications:

- Speed up to 6: 8 bags per min
- Manual feeding of bag/carton on the feeder conveyor
- Power 15: 18 kw, 3 phase
- (Connected)
- Running 8: 10 kw
- PLC controlled system
- Geared motor driven pre-pulling system for both packing rolls
- Heavy duty structure
- Shrink Tunnel Window Size (18" x 18") With Roller Conveyor
- Sensor Based Technology for sealing purpose.
- Special pneumatically driven side sealing system, two sealers to provide both side sealing to make it all around seal
- Digital Temperature Controller PID type
- Belt Conveyor for Product Moving
- Automatically Transfer of beg/carton after sealing into the tunnel
- Special double insulated chamber to reduce power losses
