Product Name:

Web Sealer Shrink Wrapping Machine

Product Code: EQUP-MC20086-0010

Description:

Web Sealer Shrink Wrapping Machine

Technical Specification:

Type Semi Automatic

Usage/Application Shrinkable

Film LD

Packaging Material Plastic

Automation Grade Semi-Automatic

Capacity Variable

Color VIP Bleu

Material Mild Steel

Voltage 220 V

Driven Type Driven

Phase three Phase

Power 180 W

Air Pressure Of Working 4 - 5 kg.

Dimension 1500 X 500 X 500

Weight 450 kg.

Packing Speed Variable

Sealing Temperature 200

Air Pressure 4 - 5 kg

Bag Type Metalized

Blower Motor 1/6 HP

Condition New

Reckoned as leaders in this industry, we are providing our esteemed clients with excellent quality Web Sealer Shrink Wrapping Machine. Increases the strength of the cartons to sustain rough handling, the offered wrapping machine is designed using top quality raw material and modern technology under the guidance of our skilled professionals. The offered wrapping machine is provided in several specifications as per the requirements of customers. Moreover, our clients can avail the offered wrapping machine from us at nominal rates.

Features:

- · Excellent speed
- User friendly
- Unique design

Specifications:

- Speed up to 6: 8 bags per min
- Manual feeding of bag/carton on the feeder conveyor
- Power 15: 18 kw, 3 phase
- (Connected)
- Running 8: 10 kw
- PLC controlled system
- Geared motor driven pre-pulling system for both packing rolls
- Heavy duty structure
- Shrink Tunnel Window Size (18" x 18") With Roller Conveyor
- Sensor Based Technology for sealing purpose.
- Special pneumatically driven side sealing system, two sealers to provide both side sealing to make it all around seal
- Digital Temperature Controller PID type
- Belt Conveyor for Product Moving
- Automatically Transfer of beg/carton after sealing into the tunnel
- Special double insulated chamber to reduce power losses
